6:20	<i>Scientific Session 3: 3D Genomics</i> Emaly Piecuch, Predoctoral Student, JAX/UConn Health Center	Auditorium
6:35	<i>Scientific Session 4: Clinical Genetics</i> Mallory Ryan, B.S., Clinical Cytogenetics Technologist II	Auditorium
6:50	<i>Education Opportunities at JAX</i> Sarah Wojiski, Ph.D., Associate Director of Education	Auditorium
7:05	Closing Remarks & Adjourn	

Our mission at The Jackson Laboratory for Genomic Medicine (JAX) is to discover precise genomic solutions for disease and educate future and current scientists. The Open House is a unique opportunity for parents, educators and students from grades 9-12 to learn about the exciting science happening right in their own backyard here at JAX. Our leading scientists will give engaging presentations about the newest breakthroughs in genomics research and personalized medicine. Students will also learn how they can best prepare themselves to pursue careers in the rapidly growing and fascinating field of biomedical research.
