

Checklist for Consultation with a Genetics Professional

A consultation with or referral to a genetics professional will be most effective when you can provide the following information:

		Notes
	Patient's cancer history including site, age at diagnosis, and interventions	
	Patient's pathology reports	
	Family cancer history	
	Other notable family medical history	
	Red flags checklist	
	Risk stratification assessment	
	Genetic testing results when available	
	Goals for referral (clarify risk, facilitate testing, interpretation, differential diagnosis, management)
