Protocol 17584: Standard PCR Assay - Laragen

Version 2.0

Notes

27410 expected CAG size is between 180 and 200

The genotyping protocol(s) presented here have been optimized for reagents and conditions used by The Jackson Laboratory (JAX). To genotype animals, JAX recommends researchers validate the assay independently upon receipt of animals into their facility. Reaction cycling temperature and times may require additional optimization based on the specific genotyping reagents used.

Expected Results

27410 expected CAG size is between 180 and 200
