

B6.129P2-Tgfa^{tm1Ard} /J

Stock No: **002219** | TGF α -

 Congenic, Targeted Mutation

Typically mice are recovered in 10-14 weeks. Contact Customer Service to place an order or for more information.

GENETIC OVERVIEW

Genetic Background

000664 C57BL/6J

Generation

Tgfa^{tm1Ard}

Alele Type

Targeted (Null/Knockout)

Gene Symbol

Tgfa

Gene Name

transforming growth factor alpha

Details

Detailed Description

Mice homozygous for the *Tgfa*^{tm1Ard} mutation develop normally, are of normal size, weight, and health, and are fertile. They display a pronounced waviness in the coat and whiskers, and dramatic derangement of the hair follicles. Older homozygous mice occasionally show some corneal inflammation that may be the result of a defect in wound healing.

Breeding Considerations

The $Tgfa^{tm1Ard}$ strain is maintained by mating homozygous siblings. Homozygous mice may be ordered. Corneas of homozygous mutants are often scarred from injuries that do not heal normally. Expected coat color from breeding: Black

PAYMENT TERMS AND CONDITIONS

Terms are granted by individual review and stated on the customer invoice(s) and account statement. These transactions are payable in U.S. currency within the granted terms. Payment for services, products, shipping containers, and shipping costs that are rendered are expected within the payment terms indicated on the invoice or stated by contract. Invoices and account balances in arrears of stated terms may result in The Jackson Laboratory pursuing collection activities including but not limited to outside agencies and court filings.

THE JACKSON LABORATORY'S GENOTYPE PROMISE

The Jackson Laboratory has rigorous genetic quality control and mutant gene genotyping programs to ensure the genetic background of JAX® Mice strains as well as the genotypes of strains with identified molecular mutations. JAX® Mice strains are only made available to researchers after meeting our standards. However, the phenotype of each strain may not be fully characterized and/or captured in the strain data sheets. **Therefore, we cannot guarantee a strain's phenotype will meet all expectations.** To ensure that JAX® Mice will meet the needs of individual research projects or when requesting a strain that is new to your research, we suggest ordering and performing tests on a small number of mice to determine suitability for your particular project. We do not guarantee [breeding performance](#) and therefore suggest that investigators order more than one breeding pair to avoid delays in their research.
