

129/Sv-Cyp2e1<sup>tm1Gonz</sup> /J

Stock No: 002910 | Cyp2e1-

 Targeted Mutation

Typically mice are recovered in 10-14 weeks. Contact Customer Service to place an order or for more information.

## GENETIC OVERVIEW

Genetic Background

Generation

*Cyp2e1<sup>tm1Gonz</sup>*

**Allele Type**

Targeted (Null/Knockout)

**Gene Symbol**

*Cyp2e1*

**Gene Name**

cytochrome P450, family 2, subfamily e, polypeptide 1

## Technical Support

### CONTACT TECHNICAL SUPPORT

#### Genotyping Protocols

Standard PCR: [Cyp2e1](#)

[Genotyping resources and troubleshooting](#)

#### Breeding Considerations

This strain is maintained by mating homozygous siblings. The expected coat color from breeding is white-bellied agouti.

[Additional Breeding and Husbandry Support](#)

#### Appearance

white-bellied agouti

Related Genotype:  $A^W/A^W$

#### Citation

When using the Cyp2e1- mouse strain in a publication, please [cite the originating article\(s\)](#) and include JAX stock #002910 in your Materials and Methods section.

#### Animal Health Reports

[Facility Barrier Level Descriptions](#)

*Production of mice from cryopreserved embryos or sperm occurs in a maximum barrier room, [G200](#)*

## Pricing & Availability

Cryo  
Recovery

Typically mice are recovered in 10-14 weeks. Contact Customer Service to place an order or for more information.

## PAYMENT TERMS AND CONDITIONS

Terms are granted by individual review and stated on the customer invoice(s) and account statement. These transactions are payable in U.S. currency within the granted terms. Payment for services, products, shipping containers, and shipping costs that are rendered are expected within the payment terms indicated on the invoice or stated by contract. Invoices and account balances in arrears of stated terms may result in The Jackson Laboratory pursuing collection activities including but not limited to outside agencies and court filings.

## THE JACKSON LABORATORY'S GENOTYPE PROMISE

The Jackson Laboratory has rigorous genetic quality control and mutant gene genotyping programs to ensure the genetic background of JAX® Mice strains as well as the genotypes of strains with identified molecular mutations. JAX® Mice strains are only made available to researchers after meeting our standards. However, the phenotype of each strain may not be fully characterized and/or captured in the strain data sheets. **Therefore, we cannot guarantee a strain's phenotype will meet all expectations.** To ensure that JAX® Mice will meet the needs of individual research projects or when requesting a strain that is new to your research, we suggest ordering and performing tests on a small number of mice to determine suitability for your particular project. We do not guarantee [breeding performance](#) and therefore suggest that investigators order more than one breeding pair to avoid delays in their research.
