Detailed Description

These transgenic mice carry both rearranged TCR alpha and beta genes from the cytotoxic CD4+ T cell clone BDC-2.5. When paired with a homozygous Rag1<sup>tm1Mom</sup> mutation (such as in Stock No. 003729), recombination of endogenous TCR and Ig is prevented so that mature T cells in these mice express only the BDC2.5 TCR. On the NOD background, mice carrying the transgenes have a reduced incidence of diabetes relative to NOD/ShiLtJ controls (12% incidence at age 30 weeks). When coupled with the homozygous Rag1<sup>tm1Mom</sup> mutation, mice develop diabetes extremely early (mean age of 25 days). (Katz et al 1993, Gonzalez et al 2001, Mombaerts et al 1992)

Payment Terms and Conditions
Terms are granted by individual review and stated on the customer invoice(s) and account statement. These transactions are payable in U.S. currency within the granted terms. Payment for services, products, shipping containers, and shipping costs that are rendered are expected within the payment terms indicated on the invoice or stated by contract. Invoices and account balances in arrears of stated terms may result in The Jackson Laboratory pursuing collection activities including but not limited to outside agencies and court filings.

The Jackson Laboratory's Genotype Promise
The Jackson Laboratory has rigorous genetic quality control and mutant gene genotyping programs to ensure the genetic background of JAX® Mice strains as well as the genotypes of strains with identified molecular mutations. JAX® Mice strains are only made available to researchers after meeting our standards. However, the phenotype of each strain may not be fully characterized and/or captured in the strain data sheets. **Therefore, we cannot guarantee a strain’s phenotype will meet all expectations.** To ensure that JAX® Mice will meet the needs of individual research projects or when requesting a strain that is new to your research, we suggest ordering and performing tests on a small number of mice to determine suitability for your particular project.
