Overview

Also Known As: eNOS\textsuperscript{-/-} C57BLKS/J \textsuperscript{db}

eNOS\textsuperscript{-/-} C57BLKS/J Lepr\textsuperscript{db} double mutant mice harbor both the spontaneous Lepr\textsuperscript{db} mutation and nitric oxide synthase 3, endothelial cell (Nos3 or eNOS) knock-out targeted mutation. Double homozygous eNOS\textsuperscript{-/-} C57BLKS/J db/db mice (also called eNOS\textsuperscript{-/-} db/db, or db/db/eNOS\textsuperscript{-/-} double mutant mice) are a robust model of type II diabetic nephropathy and may be useful for studying eNOS-mediated events in the development and progression of diabetic nephropathy.

Detailed Description

These double mutant mice harbor both the Lepr<sup>db</sup> spontaneous mutation and the Nos3 (eNOS) targeted mutation and are congenic on C57BLKS/J genetic background. Mice homozygous for both mutations (called eNOS<sup>−/−</sup> C57BLKS/J db/db, eNOS<sup>−/−</sup> db/db, or db/db/eNOS<sup>−/−</sup> - double mutant mice) are viable with development of type II diabetes and diabetic nephropathy. The eNOS<sup>−/−</sup> C57BLKS/J db/db mice develop type II diabetes with significant obesity and hypertension: while both mutations are associated with insulin resistance, the mutated leptin receptor in db/db mice chiefly accounts for the observed hyperglycemia and defective leptin signaling (leading to persistent hyperphagia and obesity), and the eNOS-deficiency accounts for the moderate systemic hypertension. In addition, eNOS<sup>−/−</sup> C57BLKS/J db/db mice exhibit rapid onset and progression of pathologic diabetic nephropathy (DN) features by 26 weeks of age; developing severe albuminuria and other DN characteristics (including arteriolar hyalinosis, increased glomerular basement membrane thickness, mesangial expansion, mesangiolysis, and focal segmental and early nodular glomerulosclerosis), also with remarkably decreased glomerular filtration rate (GFR; on the basis of impaired insulin clearance and increased serum creatinine). Double homozygous eNOS<sup>−/−</sup> C57BLKS/J db/db mice are a robust model of type II diabetic nephropathy and may be useful for studying eNOS-mediated events in the development and progression of diabetic nephropathy.

Breeding Considerations
When maintaining a live colony, mice heterozygous for the Lepr spontaneous mutation and homozygous for the Nos3 (eNOS—/-) targeted mutation may be bred together. NOTE: These mice have significant breeding difficulties. Approximately 16% of Het Hom x Het Hom matings are non-productive; approximately 23% of females only produce one litter; pre-wean loss is approximately 10%; 20% of breeders are found dead prior to retirement at 6-8 months of age.

Payment Terms and Conditions
Terms are granted by individual review and stated on the customer invoice(s) and account statement. These transactions are payable in U.S. currency within the granted terms. Payment for services, products, shipping containers, and shipping costs that are rendered
Terms of Use

No Warranty
MICE, PRODUCTS AND SERVICES ARE PROVIDED "AS IS". JACKSON EXTENDS NO WARRANTIES OF ANY KIND, EITHER EXPRESS, IMPLIED, OR STATUTORY, WITH RESPECT TO MICE, PRODUCTS OR SERVICES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTY OF NON-INFRINGEMENT OF ANY PATENT, TRADEMARK, OR OTHER INTELLECTUAL PROPERTY RIGHTS.

Credit for PRODUCTS or SERVICES
In case of dissatisfaction for a valid reason and claimed in writing by a purchaser within ninety (90) days of receipt of, PRODUCTS or SERVICES, JACKSON will, at its option, provide credit or replacement for the PRODUCT received or the SERVICES provided. JACKSON makes no other representations and this shall be the exclusive remedy of the purchaser. Please note specific policy for live mice.

Animal Care and Use for SERVICES
Consistent with the requirement for a written understanding regarding animal care and use, the JACKSON Animal Care and Use Committee will review the animal care and use protocol(s) associated with any SERVICES to be performed at JACKSON, and JACKSON shall have ultimate responsibility and authority for the care of animals while on site or in JACKSON custody.

No Liability
In no event shall JACKSON, its trustees, directors, officers, employees, and affiliates be liable for any causes of action or damages, including any direct, indirect, special, or consequential damages, arising out of the provision of MICE, PRODUCTS, or SERVICES, including economic damage or injury to property and lost profits, and including any damage arising from acts or negligence on the part of JACKSON, its agents or employees. Unless prohibited by law, in purchasing or receiving MICE, PRODUCTS, or SERVICES from JACKSON, purchaser or recipient, or any party claiming by or through them, expressly releases and discharges JACKSON from all such causes of action or damages, and further agrees to defend and indemnify JACKSON from any costs or damages arising out of any third party claims.
MICE, PRODUCTS or SERVICES are to be used in a safe manner and in accordance with all applicable governmental rules and regulations.
The foregoing represents the General Terms and Conditions applicable to JACKSON’s MICE, PRODUCTS or SERVICES. In addition, special terms and conditions of sale of certain MICE, PRODUCTS, or SERVICES may be set forth separately in JACKSON web pages, catalogs, price lists, contracts, and/or other documents, and these special terms and conditions shall also govern the sale of these MICE, PRODUCTS and SERVICES by JACKSON, and by its licensees and distributors. Acceptance of delivery of MICE, PRODUCTS or SERVICES shall be deemed agreement to these terms and conditions. No purchase order or other document transmitted by purchaser or recipient that may modify the terms and conditions hereof, shall be in any way binding on JACKSON, and instead the terms and conditions set forth herein, including any special terms and conditions set forth separately, shall govern the sale of MICE, PRODUCTS or SERVICES by JACKSON.
