– Detailed Description

This strain was generated by the Knockout Mouse Phenotyping Program ([KOMP²](#)) at The Jackson Laboratory using CRISPR technology. The targeted gene, serine/arginine-rich splicing factor 6 (*Srsf6*), encodes a protein involved in wound healing and in the regulation of keratinocyte differentiation through its role in mRNA splicing and the selection of alternative splice sites. The alteration resulted in the deletion of 736 bp, which should result in the deletion of exons 3-4 and 402 bp of flanking intronic sequence, including the splice acceptor and donor, and is predicted to cause a change of amino acid sequence after residue 85 and early truncation 92 amino acids later. As mice are characterized, phenotype data will be accessible on the [International Mouse Phenotyping Consortium](#) website.

Breeding Considerations

Heterozygotes may be bred to C57BL/6NJ (Stock No. [005304](#)) or wildtype littermates. As mice are characterized, data related to viability and fertility will be provided on the [International Mouse Phenotyping Consortium](#) website.

THE JACKSON LABORATORY'S GENOTYPE PROMISE

The Jackson Laboratory has rigorous genetic quality control and mutant gene genotyping programs to ensure the genetic background of JAX® Mice strains as well as the genotypes of strains with identified molecular mutations. JAX® Mice strains are only made available to researchers after meeting our standards. However, the phenotype of each strain may not be fully characterized and/or captured in the strain data sheets. **Therefore, we cannot guarantee a strain's phenotype will meet all expectations.** To ensure that JAX® Mice will meet the needs of individual research projects or when requesting a strain that is new to your research, we suggest ordering and performing tests on a small number of mice to determine suitability for your particular project. We do not guarantee [breeding performance](#) and therefore suggest that investigators order more than one breeding pair to avoid delays in their research.
