

CURRICULUM VITAE: **CHRISTOPHER L. BAKER, PH.D.**

The Jackson Laboratory
600 Main St
Bar Harbor, ME 04609
christopher.baker@jax.org
Work (207) 288-6365
Cell (207) 812-8797

EDUCATION

- 2004-2010 Ph.D. Department of Genetics, Dartmouth Medical School, Hanover, NH
Molecular and Cellular Biology Program
- 2001-2004 B.S., *Summa Cum Laude*, College of Agriculture and Life Sciences, University of Vermont,

PROFESSIONAL EXPERIENCE

- 2019-present Resident Supervisor, The Jackson Laboratory's Summer Student Program
- 2017-present Assistant Professor, Sackler School of Graduate Biomedical Sciences, Department of Medicine, Tufts School of Medicine, Boston, MA
- 2016-present Faculty, Graduate School of Biomedical Sciences and Engineering, The University of Maine, Orono, ME
- 2016-present Assistant Professor, The Jackson Laboratory, Bar Harbor, ME
- 2015-2016 Associate Research Scientist, The Jackson Laboratory, Bar Harbor, ME
- 2010-2015 Postdoctoral Fellow, The Jackson Laboratory, Bar Harbor, ME

Unique properties of the self-renewing subpopulation of archetypal human pluripotent stem cells. *Under revision*
2. Skelly DA, Czechanski A, Byers C, Aydin S, Spruce C, Olivier C, Choi K, Gatti DM, Raghupathy NM, Stanton A, Vincent M, Dion S, Greenstein I, Pankratz M, Porter DK, Martin W, Qin W, Harrill AH, Choi T, Churchill GA*, Munger SC*, **Baker CL***, Reinholdt RG*. Genetic variation influences ground state pluripotency in mouse embryonic stem cells through a hierarchy of molecular phenotypes. *bioRxiv*: doi: <https://doi.org/10.1101/552059> ***equal contributors** under revision: *Cell Stem Cell*

FUNDING

R35GM133724-01 Effort: 51% 07/01/2019 - 06/30/2024
 National Institute of General Medical Sciences, NIH Annual Direct Costs: \$250,000
 Cellular Systems Genetic Approaches to Understanding Regulatory Variation Total Direct Costs: \$1,250,000
 In this proposal we will quickly and efficiently define the pathways and mechanisms that modulate regulatory variation and function during early mammalian development by leveraging natural variation intrinsic in a unique mouse embryonic stem cell system.
 Role: PI

JAX-DIF-FY17-CB-SCM (Baker, Pera, Munger, Skelly, Reinholdt) Effort: N/A 04/19/2019 - 04/18/2020
 The Jackson Laboratory Director's Innovation Fund
 Genetic control of cellular heterogeneity in pluripotent stem cells Total Direct Costs: \$220,000
 The goal of this proposal is to profile transcript abundance in mouse and human PSCs to delineate the regulatory networks that underlie cell heterogeneity across a panel of diverse genetic backgrounds. We will use 1) single cell (sc)RNA-Seq to capture population dynamics and developmental trajectories, and 2) FACS isolation of specific subpopulations at different stages of pluripotency using cell-surface markers followed by standard RNA-Seq.
 Role: PI

COMPLETED

Christopher L Baker CV
 April 2020

JAX-DIF-FY17-CB-SCM (Baker, Churchill, Munger, Reinholdt) Effort: N/A 04/01/2017 - 10/31/2018
 The Jackson Laboratory Director's Innovation Fund Annual Direct Costs: \$178,000
 DO and CC RIX mESCs. An Advanced Platform for Cellular Systems Genetics Total Direct Costs: \$178,000
 The goal of this proposal is to demonstrate the power of the founder strain, DO, and CC-RIX mESC lines as a platform for cellular systems genetics. To that end, we will profile the chromatin landscape and cellular proteomes of undifferentiated mESC lines comprising the eight founder strains of the DO/CC, 150 individual outbred DO lines, and 10 F1 progeny (CC-RIX) from crosses of CC strains.
 Role: PI

JAX-DIF-FY17-KP (Paigen, Baker, Petkov) 03/01/2017 - 12/31/2017
 The Jackson Laboratory Director's Innovation Fund Annual Direct Costs: \$43,200
 Understanding the Chromatin Regulatory System Total Direct Costs: \$43,200
 The goal of this project is to expand our understanding of a newly discovered system of trans-acting genes comprising a Chromatin Regulatory System (CRS) that controls the epigenetic landscape.
 Role: Co-Investigator

F32GM101736-01 (Baker, PI) 2012-2014 (salary support)
 National Institute of General Medical Sciences, NIH
 Ruth I. Kirschstein National Research Service Award
 Title: Genetic Dissection of Quantitative Control of Recombination

AWARDS AND HONORS

2016 PALM (Promoting Active Learning and Mentoring) Fellowship. [see press](#)
NSF funded fellowship to promote long-term mentorship to improve undergraduate education.

2014 Outstanding Oral Presentation, 28th International Mammalian Genome Conference

2013 Outstanding Oral Presentation, 27th International Mammalian Genome Conference

2012-2013 Ruth I. Kirschstein National Research Service Award
Individual postdoctoral fellowship

2010-2012 T32 Postdoctoral Fellowship, The Jackson Laboratory
Institutional competitive fellowship

2010 John W. Strohbehn Award for Excellence in Biomedical Research, Dartmouth Medical School
awarded to a single graduating Ph.D.

2009 Rosaline Borison Memorial Fellowship

2008 Society for Research on Biological Rhythms (SRBR) Excellence Award
student travel award

2007 Albert J. Ryan Fellow, Albert J. Ryan Foundation

2006-2008 National Institute for Health Pre-doctoral Training Grant, Dartmouth Medical School

2003 & 2004 Hughes Endeavor for Life Science Excellence Grant (HELIX), University of Vermont
competitive undergraduate research award

2003 Class of 1939 Scholarship, a merit based award, University of Vermont

2003 James E. Ludlow Endowed Scholarship Award, University of Vermont

2002 & 2003 Holzer Memorial Scholarship, a merit based award, University of Vermont

INVITED PRESENTATIONS

1. Cold Spring Harbor Laboratory, The Genome Access Course. November 11th, 2019.
2. Sloan Kettering Cancer Center, Manhattan, NY. November 10th, 2019.
3. Tufts University Sackler Medical School, Boston, MA. Department of Genetics Seminar. May 9th, 2018. Natural genetic variation shapes the epigenetic landscape and patterns of inheritance.
4. Time of Our Life Symposium. July 13-14th, 2017. Hanover, NH. Genetic control of the epigenetic landscape.
5. 44th Annual Maine Biological and Medical Science Symposium. April 28-29th, 2017. Mount Desert Biological Laboratory. Non-Mendelian inheritance, meiotic drive, and genetic recombination.

CONFERENCE PRESENTATIONS

1. Stem Cell Biology. September 17-21st, 2019. Cold Spring Harbor, NY. Genetic variation influences ground state pluripotency in embryonic stem cells through a hierarchy of molecular phenotypes.
2. The 32nd International Mammalian Genome Conference. November 11-14th, 2018. Rio Mar, PR. A nucleosome remodeling factor is required for PRDM9-dependent meiotic recombination.
3. Mammalian Genetic and Genomics: From Molecular Mechanisms to Translational Applications. October 24-27th, 2017. EMBL Heidelberg, Germany. Genetic control of the epigenetic landscape.
4. The Allied Genetics Conference. July 13-17th, 2016. Orlando, FL. Natural genetic variation controls chromatin state in male germ cells.
5. The 28th International Mammalian Genome Conference. October 25-29th, 2014. Bar Harbor, ME. PRDM9 drives evolutionary erosion of hotspots. **Selected as outstanding presentation**
6. The 27th International Mammalian Genome Conference. September 15, 2013. Salamanca, Spain. Genome-wide analysis of PRDM9-dependent chromatin modification. **Selected as outstanding presentation**
7. The Center for Genome Dynamics Advisory Board Meeting. June 25, 2013. Bar Harbor, ME. Genome-wide analysis of PRDM9-dependent chromatin modification.

POSTER PRESENTATIONS

1. 3D Genome: Gene Regulation and Disease. March 17-21st, 2019. Banff, Alberta, Canada. PRDM9-dependent recruitment of HELLS is required for activation of meiotic recombination and fertility.
2. Population, Evolutionary and Quantitative Genetics Conference. May 13-16th, 2018. Madison, WI. Tissue-specific *trans* regulation of the chromatin landscape.
3. Chromosome Architecture and Chromosome Organization. March 23-27th, 2018. Whistler, Canada. Tissue-specific *trans* regulation of the chromatin landscape.
4. Chromatin and Epigenetics. May 3-6th, 2017. EMBL Heidelberg, Germany. Generic control of epigenetic landscape in germ cells.

5. The 29th International Mammalian Genome Conference. November 8-11th, 2015. Yokohama, Japan. Multimer formation explains allelic suppression of PRDM9 recombination hotspots.
6. The Biology of Genomes. May 5-9th, 2015. Cold Spring Harbor, NY. Poster. Multimer formation explains allelic suppression of PRDM9 recombination hotspots.
7. Gordon Research Conference: Meiosis. June 1-6th, 2014. New London, NH. PRDM9 drives evolutionary erosion of hotspots through haplotype-specific initiation of meiotic recombination.
8. Gordon Research Seminar: Meiosis. June 2-3, 2012. New London, NH. Poster presentation: PRDM9 dependent Histone H3 Lysine 4 trimethylation and DNA binding at human hotspots.
9. The 10th International Conference on Systems Biology 2009. August 30 – September 4, 2009. Stanford, CA. Quantitative proteomics investigation of the *Neurospora* circadian system.
10. Society for Research on Biological Rhythms 20th Anniversary Meeting. May 17-21, 2008. Sandestin, FL. Analysis of protein interactions in the *Neurospora crassa* circadian clock.
11. Neurospora 2008 Asilomar Meeting. March 27-30, 2008. Asilomar, CA. Characterization of the *Neurospora crassa* circadian clock interactome.
12. Albert J. Ryan Foundation Annual Meeting. May 2007. Holderness, NH. Multisite phosphorylation of a *Neurospora* circadian clock protein.

TRAINING AND MENTORSHIP

Predoctoral students

2013-2014 Shimpei Kajita (1 year exchange programs for predoctoral students from Japan)

2017-current Candice Byers, Tufts University, Genetics Program

Rotations:

2018 spring Uma Aurora, Tufts University

2019 winter Ben Clauss, Tufts University

2020 winter Haley Fortin, Tufts University

2020 spring Elli Hartig, Tufts University

Master's thesis students

2018- Catrina Spruce, Molecular and Biomedical Sciences Program, University of Maine

Post-baccalaureate Interns

2017-2018 Sbonga Dlamini

Summer student/interns

2017, 2018 Naomi Bronkema, Swarthmore College

2019 Elizabeth Rauk

Thesis Committee Membership

2017-2019 Eraj Khokhar, The Graduate School of Biomedical Science and Engineering, University of Maine

- 2018- Jessie Rochester, The Graduate School of Biomedical Science and Engineering, University of Maine
- 2018- Uma Aurora, Sackler School of Graduate Biomedical Sciences, Tufts University
- 2019- Ben Clauss, Sackler School of Graduate Biomedical Sciences, Tufts University *committee chair

Qualifying Exam Committee

- 2018 Uma Aurora, Tufts University
- 2018 Salwa Mostafa, Tufts University
- 2019 Ben Clauss, Tufts University *committee chair

TEACHING EXPERIENCE

- 2018-current Faculty advisor for Tufts Genetics journal club. Course #: GENE-0295-101
- 2016-current Instructor, Mammalian Genetics II, Tufts/GSBSE/The Jackson Laboratory, Bar Harbor, ME (*seminar course for first year graduate students. I teach one lecture and workshop on epigenetics and chromatin*)
- 2016 Instructor, Colby College Genomics Course, The Jackson Laboratory, Bar Harbor, ME (*two week course focusing on learning genomics, both laboratory and computational modules*)
- 2014-2017 Teaching Assistant and Instructor, Genetics I and Genetics II, The Jackson Laboratory, Bar Harbor, ME (*college level introductory genetics course for JAX employee's*)
- 2013 Instructor, Topics in Biomedical Research, College of the Atlantic, Bar Harbor, ME
- 2013 Guest Lecturer, Genomics and Bioinformatics, Middlebury College, Middlebury VT
course instructor Jeremy Ward, Ph.D.
- 2012 Instructor, Cutting Edge Techniques, The Jackson Laboratory summer student program, Bar Harbor, ME
- 2006 Teaching Assistant, Molecular Genetics of Prokaryotes and Lower Eukaryotes, Dartmouth College, Hanover, NH
- 2002 Teaching Assistant, CDAE Department course on computer applications, University of Vermont, Burlington, VT

ADDITIONAL TRAINING

- 2014 The Jackson Laboratory, Bar Harbor, ME
The Whole Scientist Course (one-week course)
- 2012 The Jackson Laboratory, Bar Harbor, ME
Short Course on Medical and Experimental Mammalian Genetics (two-week course)
- 2011 The Jackson Laboratory, Bar Harbor, ME
Short Course on Systems Genetics (one-week course)

SERVICE COMMITTEES

Christopher L Baker CV
April 2020

2019-current Tufts Graduate School JAX Genetics Program Admissions Committee

2018-current Faculty partner for Protein Purification and Production (PPP) core service at The Jackson Laboratory

2018-current Bioinformatics Training Working Group, The Jackson Laboratory. Committee to develop a plan to provide training for JAX researchers and trainees in computational and statistics skills.

2017-2019 Faculty retreat planning committee. Two-year term. *committee chair 2019

2017-current Research Animal Facility Advisory Committee, The Jackson Laboratory

2006-07 Molecular and Cellular Biology Graduate Committee, Dartmouth College

2003-04 Dean's Student Advisory Committee, University of Vermont

PROFESSIONAL MEMBERSHIP

American Association for the Advancement of Science

Genetic Society of America

International Mammalian Genome Society

SCIENTIFIC COMMUNITY SERVICE

2017 University of Maine Student Symposium Judge, Cross Insurance Center, Bangor, ME

2015 Science Fair Judge, Connors Emmerson Elementary School, Bar Harbor, ME

2011 Maine State Science Fair Judge, grades 9-12, Bar Harbor, ME

2012-current Guest Speaker for science lessons at local elementary and middle schools

2009 Vermont State Science Fair Judge, grades 6-12, Norwich University, VT

2006 School-to-Career Mentor, service for high school students, NH

Ad hoc reviewer: PLoS One, Philosophical Transactions B, Mammalian Genome, Genome Research, Stem Cell Reports
