
This mouse strain (including any and all progeny, "MICE") is distributed by The Jackson Laboratory with the following terms and conditions.

Limited Use Label License for Licensed Mice

This genetically modified mouse model ("Model") is sold subject to a license agreement for transcription activator-like (TAL) effector technology between The Jackson Laboratory and Life Technologies Corporation (LTC). The purchase of this Model conveys to the buyer the limited, non-transferable right to use (i) the Model, (ii) progeny or derivatives of the Model generated by buyer, and (iii) cells, tissue, or other biological material extracted or derived from such Model or its corresponding progeny or derivatives (where (i), (ii), and (iii) are collectively defined as "Material") only to perform internal research for the sole benefit of the buyer. The buyer cannot sell or otherwise transfer Material to a third party, or otherwise use Material for any Excluded Use, except that buyer may transfer Material to: (1) the buyer's legal affiliates; (2) a non-profit performing collaborative research with the buyer; or (3) a contract research organization under a contractual obligation to perform research services solely for the benefit of the buyer, provided that in each case the legal affiliate, collaborator or contract research organization agrees in writing not to transfer Material to any third party and to use such Material solely for research as set forth in this limited use label license and not for any Excluded Use. All sales of Models are reported to LTC.

"Excluded Use" means

- (i) any activity for consideration, including but not limited to: (a) any use, directly or indirectly, in manufacturing, production, or quality control, (b) except as specifically set forth above, any use to provide a service, information, or data, (c) any use for therapeutic, diagnostic or prophylactic purposes, or (d) any sale, resale, leasing, or licensing, whether or not for research purposes;
- (ii) any activity in a Phase I or later clinical trial;
- (iii) any activity in any agricultural field trial, including any such field trial that would be subject to regulation by the United States Department of Agriculture if the Plants were to constitute genetically engineered organisms under 7 C.F.R. § 340 (or any successor regulation);
- (iv) any activity directed towards the submission of data to the United States Food and Drug Administration, the United States Department of Agriculture, the United States Environmental Protection Agency, or any equivalent regulatory agency outside of the United States, in support of an application for clearance, approval or deregulation by such agency;
- (v) screening or profiling of more than 10,000 distinct compounds (high-throughput screening);
- (vi) cell line development for purposes of bioproduction;
- (vii) scale-up activities, the primary focus of which is to increase from small-scale to production-scale;
- (viii) any use in or with Plants; and
- (ix) all other uses not specifically permitted under this limited use label license.

"Plant" means any plant, plant tissues or plant cells, including green algae (but excluding fungi and blue-green algae) generated by use of Material, or any progeny (propagated through any number of generations) or unmodified derivatives of such plants, tissues or cells.

For information on obtaining additional rights to use Material for any Excluded Uses except for Plants, please contact outlicensing@thermofisher.com.
For information on obtaining additional rights to use Material in Plants, please contact Two Blades Foundation at info@2blades.org or Two Blades Foundation, 1630 Chicago Avenue, Suite 1901, Evanston, IL 60201 USA.
