#### Product Marking "Research Use Only"

Use of the Tetracycline controllable expression systems (the "Tet-System") is covered under U.S. patent numbers: 7,541,446; 8,383,364; 9,181,556 European Patents 1954811, 2352833 and corresponding patent claims outside these regions. The rights to these patents are controlled by TET Systems GmbH & Co.KG. Not-for-profit and academic research institutions are granted an automatic license to use the Tet-System only for internal, academic research purposes with the purchase of this product, which license specifically excludes the right to sell, or otherwise transfer, the Tet-System or its component parts to third parties. In accepting this license, all users acknowledge that the Tet-System is experimental in nature, and that the product will not be used in humans. TET Systems GmbH & Co.KG makes no warranties, express or implied of any kind, and hereby disclaims all warranties, representations or guarantees of any kind as to the Tet-System, patents or products. For profit entities are required to obtain a license from TET Systems GmbH & Co.KG prior to purchasing these reagents or using them for any purpose.

The Jackson Laboratory is required by its licensing agreement to submit a report of all purchasers of the Tet controllable expression systems to TET Systems GmbH & Co.KG.

JACKSON reports sales to TET-Systems.
